- 4 cups in cupping

Our Treatment.

Together Fourology has combined the intelligence of Caleb O., Kayleigh N., Laurel N., and Shelby H. to create a modern day treatment plan to increase the overall wellness and stress of the general population through our simple four step treatment plan. Fourology had heard the complaints and concerns of the general public about the general wellness and overwhelming levels of stress in this modern day. We have a treatment that will help to significantly reduce the levels of stress that you encounter in your everyday life. We are here to insure a better life if you follow our simple four step treatment plan.

Together the team of four has created a new treatment to help relieve and moderate stress to levels that no

other treatments have done before. This new and exciting treatment involves just four short steps towards a better wellbeing. Fourology combines the use of acupuncture, herbal pills, electro pads, and cupping. The new treatment brought to you by Fourology is offered in three different treatment plans. The levels are intended to meet the different stress levels patients of Fourology may be going through. A person with a lot of stress is recommended to go through our God treatment plan and a person with not an excessive amount of stress but still seeking relief would be recommended to the Forology Bronze treatment plan.
